Physics is a very interesting field to the layperson: nuclear energy, space exploration, astronomy and cosmology, just to mention a few fields. But to understand physics requires much study, so popularizations are legio, even many books are best-sellers. This book deserves to be one. A motivation for Felix Alba-Juez (FAJ) to write 325 pages of dense text in rather small font was his annoyance with the popularizing literature.

Actually these two paths only differ in language: the first uses ordinary language whereas the second uses mathematics. What annoys FAJ is that the people who know best - the theoretical physicists - are seldom good at popularizing. Although most readers probably think that they know what is meant by mass, weight, force, and energy, perhaps also by inertia, gravitation,...
