Not illustrated. 1882 Excerpt: .action. An equal immunity is possessed by Distilled Water before it has been in contact with the Air. But the case is very different with Rain Water, which in its descent from the clouds has amply provided itself with Oxygen. An oxide (X) is promptly formed on the surface of any lead gutters, pipes, and cisterns prepared for its reception, and as it is perfectly soft, containing only about Sulphate of Lime is included by an eminent author as a protective, with the Carbonate and Phosphate. Yet we are told that the contact of Plaster of Paris with Lead should be avoided, as it occasions corrosion in the presence of moisture. two grains of earthy salts per gallon, that oxide is readily dissolved. The presence of Zinc tends materially to promote the oxidizing and dissolving of Lead, and Zinc pipes of impure quality, which often...
