*This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).*

Not illustrated. 1906 Excerpt: . . . this end principles and their applications are carefully considered. MENTAL ARITHMETIC. Recognizing the importance of mental arithmetic as a disciplinary study, and realizing the fact that when properly taught it adds keenness to the mind, develops a habit of concentration and attains another end of equal importance--the development of the reasoning faculty--a course in mental arithmetic is given during the second and fourth quarters of the year. PROFESSIONAL ARITHMETIC. A teacher should have a clear Conception of the fact that the entire subject of arithmetic depends upon the application of a few simple principles. The study should proceed from experience and should be related to objects and the affairs of life as much as is reasonable and practicable. The child should have that facility in the use of numbers which enables him to sink the calculation into automatic fashion. With these ends in view, each topic is examined to determine what the child already knows concerning it, for which he must be held responsible, and further what he does not know, and must therefore be taught. Following this grouping of the subject are plans for teaching that which is unknown, together with a consideration of the difficulties liable to present themselves, and suggestions for overcoming the same. The realization that each subject at no very distant time becomes the means to an end modifies the plan of teaching. As nothing can be of greater importance in this subject than clearness of presentation and accuracy in computation, much...
