## An Account of the Caves of Ballybunian County of Kerry

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 124 pages. Original publisher: Boulder, CO : National Institute of Standards and Technology, Electromagnetics Division, 2006 OCLC Number: (OCOLOC)80017884 Subject: Construction and demolition debris - United States. Excerpt: . . . analyzer via an IEEE-488 interface bus and the GPS receiver via a serial interface. The GPS information was recorded to track the position of the mobile cart during the perimeter measurements around the building. The software was written to maximize throughput of the data collection process and to run for an undefined time interval. This was achieved by running parallel processes of collecting, processing, and saving the data for post-collection processing. The data were continuously read from the spectrum analyzer at its optimal settings and stored in data buffers. These buffers were read and processed for each signal and displayed for operator viewing. The processed data were then stored in additional buffers to be re-sorted and saved to a file on disk. The initial setup of the parameters for the spectrum analyzer determined the quality of optimization for this process. There were several instrument parameters that were critical during the setup, including the analyzer sweep time, resolution...
